Foreword

A list of ENC producer agency codes was originally published in November 1996 as Annex A to S-57 Appendix A, under the title "IHO Codes for Producing Agencies". Because the list of producer codes is liable to revision more frequently than the S-57 standard, it was subsequently decided to publish the list of ENC producer codes in a stand-alone IHO publication S-62 - List of Data Producer Codes. After the publication of IHO S-100 and the associated S-100 Geospatial Information Registry, it was decided to manage and maintain all producer codes in data producer code registers within the registry. The data producer code register is divided into a main register for producer codes allocated to States or groups of States for the production of officially authorised nautical products meeting the requirements of marine navigation as laid down in the Convention on the Safety of Life at Sea (SOLAS) Chapter V, and a supplementary register for producer codes allocated to other organisations and entities. Most of the producer codes in the supplementary register were previously maintained on the Open ECDIS Forum.
